About the Project

2016/01/23

The NEREID project (“NanoElectronics Roadmap for Europe: Identification and Dissemination”) is dedicated to map the future of European Nanoelectronics. Started in November 2015, NEREID is a Cooperation and Support action that has received funding for three years from the European Union’s Horizon 2020 research and innovation programme under grant agreement No 685559.

NEREID’s objective is to develop a roadmap for the European nanoelectronics industry, starting from the needs of applications and leveraging the strengths of the European eco-system. In addition, it will lead to an early benchmark/identification of promising novel nanoelectronic technologies, and an identification of bottlenecks all along the innovation (value) chain.

The NEREID project (ICT-CSA-685559) is supported within the Research and Innovation Programme **Horizon 2020** by the **EU**.
